In a two-candidate election, candidate X received 1.6 percent fewer votes than candidate Y. If 25 votes that were cast for Y had instead been cast for X, both candidates would have obtained exactly the same number of votes. How many votes were cast in total?

- (A) 3125
- (B) 6250
- (C) 6750
- (D) 6200
- (E) None of these

Train P is three times as long as Train Q. P passes a signal post in 12 sec while Q takes 18 sec. If P clears a platform in 30 sec, how long will Q need to cross the same platform?

- (A) 75 sec
- (B) 84 sec
- (C) 92 sec
- (D) 96 sec
- (E) None of these

A sum of money amounts to Rs 57,600 after 2 years and Rs 82,944 after 4 years at the same rate of compound interest. What is the original principal?

- (A) 42,000
- (B) 38,000
- (C) 40,000
- (D) 36,000
- (E) None of these

A dairy owner has 50 litres of milk costing Rs 60 per litre. By adding water (free) and selling the mixture at the same price of Rs 60 per litre, he wants to earn 20% profit on his cost. How many litres of water must he mix?

- (A) 8
- (B) 9
- (C) 10

- (D) 11
- (E) None of these

A pouch holds 7 yellow and 13 purple marbles. If one marble is drawn, the probability of getting a purple marble reduces to p/q . Find $p + q$.

- (A) 33
- (B) 31
- (C) 35
- (D) 29
- (E) None of these

Three numbers are $2P$, $P + 24$ and $P + 48$. Fifty percent of the first number equals twenty percent of the third number. The second number is what percent of the third?

- (A) 66.67
- (B) 62.50
- (C) 60
- (D) 75
- (E) None of these

Mixture P consists of oil and petrol in the ratio 4 : 1. Forty litres of the mixture are withdrawn and replaced with 20 litres of petrol, producing a blend that is 60% oil. If, instead, 25 litres of petrol had been added to the initial mixture (before taking out 40 liters of mixture), what would be the percentage of oil in the resulting blend?

- (A) 75%
- (B) 58.33%
- (C) 64%
- (D) 66.67%
- (E) None of these

In a garden, 35% of the trees are apple trees. The number of apple trees equals 70% of the number of orange trees, and all remaining trees are pear trees.

If there are 60 pear trees, how many trees are there in total?

- (A) 420
 - (B) 360
 - (C) 440
 - (D) 400
 - (E) None of these
-

Shalini saves 20 percent of her monthly pay in the bank. Of what remains, she spends half on rent and ₹ 11,200 on household needs, leaving her with ₹ 6,400. How much does she put into the bank?

- (A) Rs. 8,000
 - (B) Rs. 9,600
 - (C) Rs. 7,200
 - (D) Rs. 8,800
 - (E) None of these
-

The difference between compound and simple interest on a certain sum for 2 years at 20% p.a. is Rs 240. What is the principal?

- (A) 7,000
 - (B) 6,500
 - (C) 6,000
 - (D) 6,750
 - (E) None of these
-

Vivek, Arjun and Karan each bought the same laptop model and sold them a year later. Vivek's selling price was 20 percent lower than Arjun's and 25 percent higher than Karan's. Karan's selling price is what percent of Arjun's?

- (A) 60
 - (B) 64
 - (C) 62.50
 - (D) 72
 - (E) None of these
-

A container holds 60 litres of fruit cordial and water in the ratio 3 : 1. After 28 litres of the mixture is taken out and replaced with 8 litres of pure cordial, what percentage of the new mixture is water?

- (A) 16.67%
 - (B) 37.50%
 - (C) 20%
 - (D) 22.50%
 - (E) None of these
-

A sum becomes four times itself in 3 years at simple interest. At the same rate, to what amount will Rs 2,500 grow in 3 years if interest is compounded annually?

- (A) 22,000
 - (B) 18,000
 - (C) 26,000
 - (D) 20,000
 - (E) None of these
-

Arjun and Bhavna spend 60% and 50% of their salaries respectively. Their savings are in the ratio 2 : 3. If Bhavna earns Rs. 12,000 more than Arjun, what is Bhavna's salary?

- (A) Rs. 72,000
 - (B) Rs. 84,000
 - (C) Rs. 60,000
 - (D) Rs. 66,000
 - (E) None of these
-

Train C is 300 m long and overtakes train D, 120 m long, in 36 s while both move in the same direction. If C runs at 60 km/h, what is D's speed?

- (A) 12 km/h
 - (B) 24 km/h
 - (C) 30 km/h
 - (D) 18 km/h
 - (E) None of these
-

Eight people stand in a line. Each person has three times as many chocolates as the person immediately in front of him. If the first person has 4 chocolates, how many chocolates do all eight people have together?

- (A) 13,120
- (B) 14,320
- (C) 12,800
- (D) 12,490
- (E) None of these

A boat takes 4 hours to travel a certain distance downriver and 12 h to return the same distance upriver. If the sum of its downstream and upstream speeds is 24 km/h, what is the river current's speed?

- (A) 6
- (B) 5
- (C) 4
- (D) 7
- (E) None of these

A total of Rs 30,000 is lent partly at 10% p.a. and the remainder at 18% p.a., both for 2 years. If the total simple interest earned is Rs 9,600, how much was lent at 10%?

- (A) 7,500
- (B) 6,000
- (C) 9,000
- (D) 10,500
- (E) None of these

A thief has a 120 metre lead over Constable Raghav. The thief runs at 6 km/h, and the constable sets off at the same moment to catch him. If the constable overtakes the thief in 72 seconds, what is the constable's speed?

- (A) 10 km/h
- (B) 12 km/h
- (C) 14 km/h

- (D) 16 km/h
- (E) None of these

A hall measures 9 m $\times$ 6 m. How many tiles, each 30 cm $\times$ 25 cm, are needed to cover the floor completely?

- (A) 640
- (B) 680
- (C) 720
- (D) 760
- (E) None of these

The sum of the first three terms of an arithmetic progression is 36, and its 6th term is 40. The sum of how many terms equals 810?

- (A) 12
- (B) 14
- (C) 15
- (D) 16
- (E) None of these

A 150 litre mixture of milk and water contains 40% water. How many litres of water must be added so that water becomes 55% of the mixture?

- (A) 40
- (B) 60
- (C) 75
- (D) 50
- (E) None of these

Train E is one third as long as Train F. E glides past a pole in 10 sec at 72 km/h, while F moves at 90 km/h. How long will F need to clear a tunnel 300 m in length?

- (A) 28 sec
- (B) 32 sec
- (C) 36 sec

- (D) 40 sec
(E) None of these

- (C) 330 m^3
(D) 420 m^3
(E) None of these

Two identical cubes of edge 12 cm are joined face to face to form a cuboid. By what percentage does the total surface area decrease?

- (A) 14.29
(B) 16.67
(C) 16.25
(D) 20
(E) None of these

Eight years ago, the mean age of a 10 member group was 25 years. Four years later, a 32 year old left, and two years after that, a 24 year old joined the group. What is their present average age?

- (A) 31 years
(B) 33 years
(C) 32 years
(D) 34 years
(E) None of these

In a village, males form 50% of the population. If 60% of the males and 70% of the females are literate, what percentage of the entire population is illiterate?

- (A) 30 %
(B) 35 %
(C) 38 %
(D) 25 %
(E) None of these

Train R flashes past a lamp post in 18 sec. The same train meets train S of equal length travelling in the opposite direction, the overtake lasting 24 sec. If R's speed is 20 m/s, find S's speed.

- (A) 22.50 m/s
(B) 15 m/s
(C) 10 m/s
(D) 12.50 m/s
(E) None of these

A vendor bought 150 mangoes at ₹ 6 each. Thirty were spoiled. He sold each of the remaining mangoes at ₹ 18 for every 3 mangoes. Find his overall gain or loss percentage.

- (A) 15
(B) 10
(C) 20
(D) 25
(E) None of these

Nandita and Sameer can produce 540 candles in 18 days working together. Nandita is 50 percent more efficient than Sameer. How many days will Sameer alone take to make 360 candles?

- (A) 24
(B) 30
(C) 33
(D) 27
(E) None of these

Tank A is twice as long and 1.5 times as wide as Tank B, while Tank B is twice as tall as Tank A. Their capacities differ by 120 m^3 . What is the capacity of Tank A?

- (A) 240 m^3
(B) 300 m^3

P and Q invested Rs. 16,000 and Rs. 24,000 respectively. P kept the money for 'S + 1' months and Q for 'S - 2' months. If their (P & Q respectively) profit ratio was 3 : 4, what is half the value of S?

- (A) 26
- (B) 8
- (C) 16
- (D) 13
- (E) None of these

A depositor invests Rs 56,000 at 8% p.a. simple interest for 3 years and another sum of Rs Y at the same rate for 5 years. If the total interest equals 30% of the combined principal, find Y.

- (A) 28,000
- (B) 32,000
- (C) 33,600
- (D) 36,000
- (E) None of these

Rohan bought 200 footballs at the same price. He sold some at 12% loss and the rest at 18% profit. If he breaks even overall, how many footballs were sold at 12% loss?

- (A) 80
- (B) 150
- (C) 60
- (D) 120
- (E) None of these

An article was sold for a 25% profit. Had it been sold for 25% more than that price, the additional profit would have been ₹ 1,000. What was the cost price?

- (A) Rs. 2,400
- (B) Rs. 4,000
- (C) Rs. 2,800
- (D) Rs. 3,600
- (E) None of these

A boat runs 180 km downstream in 9 h and 150 km upstream in 15 h. Find the average of time taken to cover 30 km in still water, 30 km upstream and 80

km downstream.

- (A) 2
- (B) 4
- (C) 3
- (D) 5
- (E) None of these

Train P covers a platform that is twice its own length in 60 seconds. Train Q traverses the same platform in 90 seconds and runs at 80 percent of Train P's speed. How many seconds does Train Q need to pass a lone signal pole?

- (A) 28 sec
- (B) 32 sec
- (C) 40 sec
- (D) 45 sec
- (E) None of these

Rohan bought 50 mugs, but 5 pieces got damaged during shipping. At what percentage above the cost price per mug should he fix the mark price so that he breaks even?

- (A) 10
- (B) 6.25
- (C) 8.33
- (D) 11.11
- (E) None of these

In a contest between two candidates, 25% of registered voters stayed away. The winner was supported by 50% of all registered voters and defeated the rival by 1,200 votes. How many voters were on the register?

- (A) 5,000
 - (B) 6,000
 - (C) 4,800
 - (D) 4,500
 - (E) None of these
-

A trader allowed a 30% discount on an article and still earned a 15% profit. If the marked price exceeds the cost price by Rs. 6,300, what is the marked price?

- (A) Rs. 15,400
- (B) Rs. 15,800
- (C) Rs. 16,400
- (D) Rs. 16,100
- (E) None of these

Nisha deposits Rs 10,000 and receives Rs 12,400 after 4 years at simple interest. If the rate had been 3 percentage points higher, what amount would she have received after the same 4 years?

- (A) 14,800
- (B) 13,600
- (C) 13,400
- (D) 12,800
- (E) None of these

Points X and Y are connected by a straight road. Arjun and Kunal start toward each other from X and Y. After meeting, Arjun takes 49 seconds and Kunal 36 seconds to reach Y and X respectively. If Arjun's speed is 12 m/s, find the distance between X and Y (in metres).

- (A) 1024 m
- (B) 1050 m
- (C) 1080 m
- (D) 1092 m
- (E) None of these

Meena borrowed Rs. 30,000 at 20% compound interest per annum for three years. She repaid Rs. 10,000 at the end of the first year and Rs. 12,000 at the end of the second year. What amount (in rupees) must she pay at the end of the third year to clear the loan?

- (A) 22,000
- (B) 23,040

- (C) 23,680
- (D) 24,560
- (E) None of these

Meena paid Rs 60 per litre for pure milk. She mixed 6 litres of water with every 24 litres of milk and sold the mixture at 12 % above the cost price of pure milk. What is her actual profit percentage?

- (A) 40
- (B) 37.50
- (C) 33.33
- (D) 45.45
- (E) None of these

Fifteen cards are numbered 1 to 15. If one card is picked, the probability of getting a composite number simplifies to p/q . What is $p + q$?

- (A) 19
- (B) 23
- (C) 25
- (D) 27
- (E) None of these

Rohit invested Rs. 6,400 at 25% per annum, with the interest being compounded half yearly during the first year and yearly in the next. How much total interest (in rupees) will he earn at the end of two years?

- (A) 3,500
- (B) 3,600
- (C) 3,725
- (D) 3,800
- (E) None of these

Two pipes can fill a tank individually in 12 hours and 30 hours. Because of a leak at the bottom, they together fill the tank in 60 hours. If the tank is full, how many hours will the leak alone take to empty it?

- (A) 10
 - (B) 12
 - (C) 15
 - (D) 20
 - (E) None of these
-

Priya finishes 75 percent of a project in 15 days, while Kamal completes 30 percent in 4 days. Working together, how many days will they take to complete 50 percent of the project?

- (A) 3
 - (B) 4
 - (C) 5
 - (D) 6
 - (E) None of these
-

Pipes X and Y can fill a tank in 12 hours and 20 hours respectively. Outlet pipe Z empties it. If all three are opened together, the tank gets filled in 30 hours. How long does Z alone take to empty the full tank?

- (A) 8 hours
 - (B) 12 hours
 - (C) 10 hours
 - (D) 14 hours
 - (E) None of these
-

Pipe A can fill 70% of a tank in 14 minutes, whereas Pipe B can drain 50% of the tank in 20 minutes. If both pipes are opened together in an empty tank, how long (in minutes) will it take to fill the tank?

- (A) 28
 - (B) 32
 - (C) 36
 - (D) 40
 - (E) None of these
-

A works alone on a project for 4 days. The remaining work can be done either by B alone in 36 days or by A and B together in 9 days. In how many days can A alone finish the entire project?

- (A) 12
 - (B) 16
 - (C) 18
 - (D) 20
 - (E) None of these
-

Two gadgets were sold at Rs 1,800 each. On the first, the dealer made a 35 % profit; on the second, he suffered a 10% loss. What is his overall profit or loss percentage?

- (A) 6% profit
 - (B) 8% profit
 - (C) 2% loss
 - (D) 4% loss
 - (E) None of these
-

The total of the present ages of P, Q and R is 81 years. Nine years ago, their ages were in the ratio 3 : 4 : 2, respectively. How old is P now?

- (A) 24 years
 - (B) 25 years
 - (C) 26 years
 - (D) 27 years
 - (E) None of these
-

Container C contains 18 litres of water, which is 6 times the water in container D. It also has 27 litres of milk, which is 3 times the milk in D. What is the concentration of milk in container D?

- (A) 80
 - (B) 75
 - (C) 66.67
 - (D) 60
 - (E) None of these
-

A, B and C invested in a venture. A invested Rs. 40,000 more than B, and the annual profit was shared in the ratio 3 : 2 : 4. If A's share exceeded B's by Rs. 36,000, how much did C receive?

- (A) Rs. 108,000
- (B) Rs. 120,000
- (C) Rs. 132,000
- (D) Rs. 140,000
- (E) None of these

A household with 5 men and x women consumes pulses at an overall average of 3 kg per person. Each man eats 4 kg while each woman eats 2 kg. How many women live in the house?

- (A) 4
- (B) 5
- (C) 6
- (D) 7
- (E) None of these

An item was sold for Rs 2,400 after a 20% discount on its marked price. Had the shopkeeper allowed a flat discount of Rs 600 instead of 20%, he would have gained 25% on cost. Find the cost price of the item.

- (A) Rs. 1,800
- (B) Rs. 1,860
- (C) Rs. 1,920
- (D) Rs. 1,980
- (E) None of these

From towns P and Q, Rahul and Sita start toward each other at 6 a.m. Rahul reaches Q at 10 a.m., while Sita reaches P at 12 p.m. After how many minutes from 6 a.m. will they meet?

- (A) 128
- (B) 136
- (C) 144

- (D) 152
- (E) None of these

When Arjun was born, Karan was 10 years old. Today Arjun's age is 60 percent of Karan's age. How old is Arjun now?

- (A) 12
- (B) 10
- (C) 15
- (D) 16
- (E) None of these

While selling 35 identical pens, Vijay's profit equals the selling price of 7 pens. What is his profit percentage?

- (A) 20
- (B) 33.33
- (C) 25
- (D) 16.67
- (E) None of these

A fair coin is tossed five times. What is the probability of obtaining exactly four identical consecutive outcomes (but not all five identical)?

- (A) $1/6$
- (B) $1/8$
- (C) $1/4$
- (D) $1/16$
- (E) None of these

A person is habitually 45 minutes late to office. One day he increases his speed by 20% and is only 15 minutes late. If he desires to be on time, how many minutes should the trip normally take?

- (A) 135
- (B) 125
- (C) 130

- (D) 120
(E) None of these

Priya divides Rs 84,000 into two parts. Simple interest for 3 years at 12% p.a. on the first part equals the simple interest for 3 years at 18% p.a. on the second part. What is the interest earned on the first part for the 3 years at 12 %?

- (A) 17,280
(B) 17,640
(C) 18,480
(D) 18,144
(E) None of these

A trader has 180 kg of sugar. He sells one part at 12% profit and the other at 22% profit, gaining 18% overall. By how many kilograms is the quantity sold at 12% profit less than the quantity sold at 22% profit?

- (A) 24
(B) 30
(C) 34
(D) 36
(E) None of these

A dealer marks his goods 50% above the cost price. His profit falls by Rs. 90 when he raises the discount from 15% to 25%. What is the cost price of the article?

- (A) Rs. 600
(B) Rs. 540
(C) Rs. 720
(D) Rs. 500
(E) None of these

4 men and 6 women can finish a job in 15 days, while 6 men and 9 women can finish the same work in 10 days. In how many days will 2 men and 3

women complete it?

- (A) 24
(B) 28
(C) 32
(D) 30
(E) None of these

A batter's average for 50 innings is 55 runs. Removing the highest and lowest knocks leaves 48 innings averaging 53. The gap between the highest and lowest scores is 130 runs. Determine both scores.

- (A) 168 and 38
(B) 178 and 48
(C) 158 and 28
(D) 188 and 58
(E) None of these

Akash sold a machine to Bharat at a 15% profit. Bharat sold it to Chinmay at a 20% profit. Chinmay then sold it to Divya at a 20% loss, and Divya paid Rs 16,560. At what price had Akash originally purchased the machine?

- (A) Rs. 16,000
(B) Rs. 14,600
(C) Rs. 15,000
(D) Rs. 12,500
(E) None of these

Pipes A and B can fill a tank in 20 and 28 hours respectively, while outlet C can drain it in 60 hours. All three are opened together; after 12 hours C is closed. How many total hours are required to fill the tank completely?

- (A) 16
(B) 14
(C) 12
(D) 20
(E) None of these

Sandeep rows 24 km against a current flowing at 8 km/h and then rows back the same distance with the current. The round trip takes exactly 4 hours. Find his rowing speed in still water.

- (A) 12
- (B) 14
- (C) 15
- (D) 18
- (E) None of these

A train dashes past a man in 7 sec and then covers an entire platform of length y metres in 28 sec. If its speed is 54 km/h, find y .

- (A) 315 m
- (B) 275 m
- (C) 330 m
- (D) 300 m
- (E) None of these

After A works for 8 days, B can finish the rest of the job in 20 days. If A works only 5 days, B needs 35 days to complete the remainder. How many days will they need to finish the work together?

- (A) 10
- (B) 12
- (C) 15
- (D) 18
- (E) None of these

After a 25% fall in the price of sugar, a customer can buy 2 kg more sugar for Rs 240. What is the new price per kg?

- (A) Rs. 27.50
- (B) Rs. 30
- (C) Rs. 32
- (D) Rs. 36
- (E) None of these

A and B together can complete a task in X days. A alone needs $X + 32$ days, and B alone needs $X + 18$ days. Find X .

- (A) 18
- (B) 20
- (C) 22
- (D) 12
- (E) None of these

Fourteen years from now, Amit will be twice as old as he was seven years ago. Bina is 1.25 times as old as Amit, and Amit is 14 years older than Chirag. What is the present age ratio of Bina to Chirag?

- (A) 4 : 3
- (B) 5 : 2
- (C) 2 : 1
- (D) 5 : 3
- (E) None of these

The area of a square farm is $19,600 \text{ m}^2$. Find the cost of fencing it all round at Rs. 15 per metre.

- (A) Rs. 7200
- (B) Rs. 9000
- (C) Rs. 6400
- (D) Rs. 8400
- (E) None of these

Twenty one solid spheres of radius 7 cm are melted and recast into identical cubes of edge 2 cm. How many cubes are obtained?

- (A) 3773
- (B) 3896
- (C) 3943
- (D) 4200
- (E) None of these

A committee of four students is chosen from 6 girls and 5 boys. What is the probability that at least three girls are included?

- (A) $\frac{7}{22}$
 - (B) $\frac{15}{44}$
 - (C) $\frac{23}{66}$
 - (D) $\frac{20}{33}$
 - (E) None of these
-

An arithmetic progression has 24 terms. Its 10th term is 46 and its 22nd term is 82. What is its 3rd term?

- (A) 21
 - (B) 25
 - (C) 27
 - (D) 29
 - (E) None of these
-

A vendor says he earns 8% profit but gives only 900 g instead of 1 kg. What is his true profit percentage?

- (A) 16.67
 - (B) 20
 - (C) 25
 - (D) 22.50
 - (E) None of these
-

A team of 30 workers can finish a job in 36 days. They all work for 18 days, after which 6 workers leave. How many additional workers must join immediately so that the task is completed in the next 12 days?

- (A) 18
 - (B) 24
 - (C) 27
 - (D) 15
 - (E) None of these
-

A motor boat covers 18 km upstream in 36 minutes. The current flows at one-quarter of the boat's still water speed. How far can the boat travel downstream in the next 36 minutes?

- (A) 24
 - (B) 28
 - (C) 32
 - (D) 30
 - (E) None of these
-

The marked price of a product is 100% above its cost price. It is sold after successive discounts of 10% and 20%. If the difference between the selling price and cost price is Rs 3,300, find the marked price.

- (A) Rs. 12,000
 - (B) Rs. 13,500
 - (C) Rs. 15,000
 - (D) Rs. 16,800
 - (E) None of these
-

Twelve years ago, the age ratio of Deepak to Sumit was 3 : 7. If their present age difference is 24 years, what will be the ratio of Deepak's age to Sumit's age twelve years hence?

- (A) 5 : 9
 - (B) 6 : 10
 - (C) 7 : 11
 - (D) 8 : 13
 - (E) None of these
-

A solid cylinder is 15 m high with a radius of 14 m. Taking $\pi = \frac{22}{7}$, what is the difference between its curved surface area and the area of one circular base?

- (A) 352 m^2
- (B) 616 m^2
- (C) 660 m^2

- (D) 704 m^2
(E) None of these

Riya lent Rs 5,000 each to Arjun and Kabir. Arjun pays simple interest at $P\%$ p.a., Kabir at $Q\%$ p.a. After 4 years she receives Rs 1,000 more from Arjun than from Kabir. What is $(P - Q)$?

- (A) 2.5
(B) 5
(C) 6
(D) 10
(E) None of these

A trader sold a gadget for Rs 9,000 and took a loss of Rs. 6Y. Had he sold it for Rs 15,000, his profit would have been Rs. 9Y. What was the purchase price of the gadget?

- (A) Rs. 9,600
(B) Rs. 10,200
(C) Rs. 12,800
(D) Rs. 11,400
(E) None of these

The perimeter of a rectangle is $\frac{3}{4}$ of the perimeter of a square, and the rectangle's length equals the side of the square. What is the ratio of the rectangle's length to its breadth?

- (A) 2 : 1
(B) 3 : 1
(C) 5 : 2
(D) 3 : 2
(E) None of these

An inlet pipe can fill a tank in 48 hours. The pipe is opened in an empty tank; after 12 hours a leak starts, and 48 hours later the tank becomes full. In how many minutes can the leak alone empty the full tank?

- (A) 8640
(B) 9600
(C) 11520
(D) 12000
(E) None of these

An item is tagged 60% above its cost. If sold after two successive 20% discounts, the dealer's profit is Rs. 48 less than when he allows a single 30% discount. Find the cost price.

- (A) Rs. 450
(B) Rs. 500
(C) Rs. 540
(D) Rs. 600
(E) None of these

Prakash can beat Qadir by 50 m in a 500 m race, and Qadir can beat Riaz by 30 m in a 300 m race. By how many metres will Prakash defeat Riaz in a 1000 m race?

- (A) 190
(B) 200
(C) 210
(D) 240
(E) None of these

A grocer promises only 5% profit on rice but uses a fake scale and actually gains 20%. A buyer is charged for 8 kg. How much rice does the buyer really get?

- (A) 7 kg
(B) 6 kg
(C) 5.4 kg
(D) 7.2 kg
(E) None of these

A principal of Rs 30,000 grows to Rs 39,000 in 5 years at simple interest. What will a sum of Rs 8,000 amount to at the same rate in 7 years?

- (A) 11,200
- (B) 11,360
- (C) 11,440
- (D) 11,520
- (E) None of these

- (A) 12 kg
- (B) 14 kg
- (C) 18 kg
- (D) 20 kg
- (E) None of these

Suraj and Tara have efficiencies in the ratio 2 : 3. They work on alternate days with Suraj starting first, and complete a task in 10 days. If they receive ₹18,000 for the work, how much does Tara earn?

- (A) ₹10,400
- (B) ₹10,800
- (C) ₹11,200
- (D) ₹12,400
- (E) None of these

During the first 10 overs of a one day match the scoring rate was just 3 runs an over. How fast (in runs per over) must the side score in the remaining 40 overs to reach a target of 270 runs?

- (A) 4
- (B) 5
- (C) 7
- (D) 6
- (E) None of these

The average weight of Anil, Bhavna and Charu is 54 kg. The average of Anil and Bhavna is 48 kg, while that of Bhavna and Charu is 60 kg. What is Anil's weight?

- (A) 40 kg
- (B) 42 kg
- (C) 44 kg
- (D) 38 kg
- (E) None of these

A train whizzes over a 150 m bridge in 24 sec and a 350 m bridge in 32 sec. How many seconds does it take to clear a single lamp post?

- (A) 12 sec
- (B) 18 sec
- (C) 20 sec
- (D) 22 sec
- (E) None of these

The average weight of 15 people rises by 2 kg when Manoj (38 kg) is replaced by Saurabh. What is Saurabh's weight?

- (A) 62 kg
- (B) 65 kg
- (C) 70 kg
- (D) 68 kg
- (E) None of these

A cruiser takes the same total time to travel 60 km upstream and 150 km downstream as to travel 140 km upstream and 50 km downstream. If it can cover 60 km upstream and 50 km downstream in 5 h, what is its downstream speed?

- (A) 20
- (B) 16
- (C) 15
- (D) 25
- (E) None of these

Twenty two pupils average 28 kg. Two new pupils join and the class average drops by 1 kg. Find the average weight of the newcomers.

The mean weight of A, B and C is 68 kg. When D joins, the new mean falls to 65 kg. Adding E makes

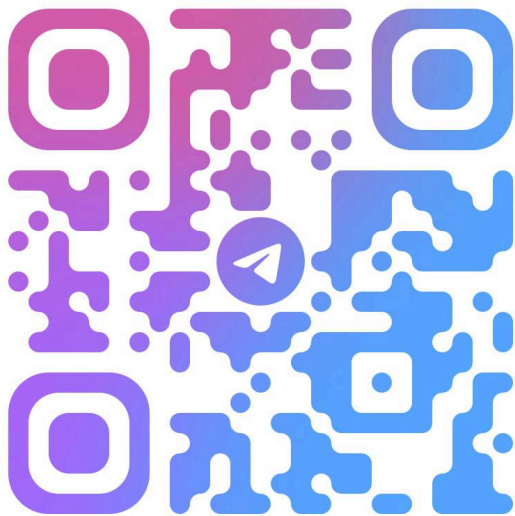

the five person mean 67 kg. What is E's weight?

- (A) 75 kg
- (B) 70 kg
- (C) 72 kg
- (D) 78 kg
- (E) None of these

Thank you
