Reasoning Puzzles Practice Set

Directions(1-5): Seven boxes- A, B, C, D, E, F and G are placed one above another in a stack. It is assumed that no other boxes are kept in the stack other than the given boxes. Each box contains different numbers of chocolates i.e. 25, 19, 17, 27, 49, 8 and 21.

Only two boxes are placed between A and F. Box G is placed immediately below A and contains lowest number of chocolates. Box B is placed three boxes above box G. The number of chocolates in box F is a prime number. Box A contains 8 chocolates more than box F. Box A does not contain less than 26 chocolates. Box C is placed immediately above the box which contains 19 chocolates. Box C contains the number of chocolates that is multiple of 3. Box B does not place adjacent to box D. Not more than two boxes are placed between boxes D and E. Box E contains more numbers of chocolate than box D and box B, which is a perfect square number.

Directions(6-10): Seven persons B, F, H, K, N, R and U are living in a seven-storey building where the lowermost floor is numbered as 1 and the floor immediately above it is numbered as 2 and so on. All of them cook different curries viz. Fish, Prawn, Crab, Dhal, Mutton, Chicken and Paneer. All the information is not necessarily in the same order. No two persons live on the same floor.

H lives on an even-numbered floor. Only two persons live between H and the one who cooks Chicken. B lives two floors above the one who cooks chicken. Only two persons live between B and the one who cooks Crab. N lives immediately below the one who cooks crab. As many persons live above N is same as below the one who cooks Paneer. K cooks fish and lives on the adjacent floor of U. Neither U nor R cooks crab. Only one person lives between K and the one who cooks Dhal. Neither B nor N cooks Mutton.

Directions(11-15): Seven persons viz. A, B, C, D, E, F and G were born in seven different months from March to September of the same year. They like seven different car brands i.e. Jeep, Toyota, BMW, Audi, Benz, Honda and Ford but not necessarily in the same order.

D was born in the month having an even number of days but not in April. Only one person was born between D and the one who likes Benz. As many persons born before the one who likes Benz as after B, who likes Honda. E was born five months after C, who does not like Benz. The one who likes Audi was born two persons after A. The one who likes Jeep was born in the immediate preceding month of the one who likes Audi. The one who likes Toyota was born two persons before F. Neither C nor G likes BMW.

Directions(16-20): Seven people – A, B, C, D, E, F and G went to the garden on seven different days of the same week starting from Sunday to Saturday. Each person eats

seven different fruits viz., Apple, Guava, Fig, Grapes, Mango, Papaya, Peach. Only one person went to the garden on each day.

B went four days before the one who eats Apple, who went before Saturday. Only two people went between B and the one who eats Mango. As many people went after the one who eats Mango as before G. The one who eats Fig went immediately before G and three days before A. Only three people went between the one who eats Guava and A. C went five days after the one who eats Guava. Only one person went between the one who eats Papaya and D. The number of people went between the one who eats Mango and Guava is one more than the number of people went between C and the one who eats Grapes. E eats neither Guava nor Fig.

Directions(21-25): Nine different countries viz., India, USA, Germany, Canada, Japan, Sweden, Russia, Italy and China have a new moon day on three different dates 4th, 17th and 25th in three different months viz., April, July and December of the same year.

Only three countries have new moon day between India and USA. Neither India nor USA have new moon day in April. Germany have new moon day immediately after USA. Only two countries have new moon day between Germany and Canada. The number of countries have new moon day after Canada is two more than the number of countries have new moon day before Japan. Sweden and Russia have new moon day on same month. Sweden is not the first country to have new moon day but have before USA. Italy have new moon day neither before China nor in the adjacent month of India.

Directions(26-30): Six persons- L, M, N, O, P, and Q are going to the shop one after another in sequential order but not necessarily in the same order. They bought different things- Dairy, Clipboard, Books, Mobile, Calculator, and Stapler.

Only three persons are going between the one who bought books and O who goes before the one who bought books. Only two persons are going between O and M. The one who bought the calculator goes immediately before or immediately after O. As many persons go before the one who bought the calculator is same as after P. The one who bought Dairy goes immediately before L. L does not go immediately before or immediately after M. The one who bought the stapler goes immediately after Q. The one who bought the Mobile goes before the one who bought Clipboard. Q does not buy Clipboard.

Directions(31-35): Six persons- L, M, N, O, P, and Q got their passports in different years- 2006, 2009, 2012, 2015, 2016, and 2019. They are from six different countries- France, Cyprus, Greece, Algeria, Brazil, and Germany. All the information is not necessarily in the same order.

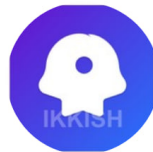

Q got the passport three years before the one who is from Germany. P got the passport immediately after the one who is from Germany. Only two persons got between P and O. L got the passport immediately before the one who is from Brazil. L got the passport in an even numbered year. P is not from Brazil. The one who is from Cyprus got the passport two persons after M. N is not got the passport immediately before or immediately after L. Neither L nor Q is from Greece. Q is not from France.

Directions(36-40): Seven bank employees A, B, C, D, E, F and G are working in a bank in different designations such as Chairman, Managing Director (MD), General Manager(GM), Senior Manager (SM), Assistant Manager (AM), Clerk and Trainee where Chairman is the senior-most designated person while Trainee is the junior-most designated person. They wear different color dresses.

The number of persons senior to B is one more than the number of persons junior to the one who wears brown dress. The one who wears brown dress is junior to B and is not the trainee. At most one person is junior to the one who wears orange dress. E is four persons senior to G but neither of them is wearing brown nor orange dress. F is immediately senior to C, who is wearing black dress. Only two persons are designated between the one who wears beige and the one who wears blue. G is neither wearing a blue nor beige color dress. The one who is immediately junior to A is wearing grey color dress. The one who wears pink color dress is not senior to the one who wears beige color dress.
